

American Elm

Ulmus americana

At 34 inches in diameter, this tree...

- Provides overall benefits of **\$76** every year!
- Reduces atmospheric carbon by **250** pounds per year.
- Intercepts **2,646** gallons of stormwater runoff per year.

Origin: Eastern North America.

Growth Habit: Medium to large deciduous tree growing to 130 feet tall.

Temperature: Can survive in a wide range of climates from warm and humid in the southeast to cold and dry in the northwest.

Watering: High water use. Supplemental irrigation needed in the summer months.

This tree suffered major losses in the eastern US due to the Dutch elm disease. It also serves as an important tree to the wood industry.

The State of Arizona Urban and Community Forestry Program is made possible with assistance from the USDA Forest Service Urban and Community Forestry Program. This institution is an equal opportunity provider.
